

Spring fashion 2023 – what are the biggest trends? I asked cool designer Anna Teurnell, founder and designer behind fashion label Teurn Studios, about her spring favourites. If you haven't already, check out Teurn Studios immediately. (I LOVE their glitter boots.) Teurn Studios makes basics with a twist in exclusive materials with a focus on craftsmanship. They are also aiming to become climate neutral by 2025. How great is that?

Hi Anna, can you tell us about the inspiration behind your spring collection?

– It's wearable clothes that last a long time and can be combined with what you already have. I'm very inspired by American spring and preppy colours, with stripes, chinos and corduroy trousers. It's about the simplicity of matching the pieces too, like a pair of well-cut trousers with a lovely, luxurious sweater.

Chic 'loungewear' – things that are comfortable and cosy to wear, but that look nice too of course. Like sets in smart stripes. Pretty, woven tops to match our luxurious miniskirts in certified bonded leather. Bonded leather is a double leather that has the same appearance on both the front and back, and TEURN uses bonded leather to create a truly luxurious and high-quality feel.

What are Teurn Studios' key pieces for this spring and summer?

– Delightful sets in smart stripes and exclusive materials. Bonded pieces – a jacket and a mini skirt in leather that feel wonderfully luxurious. Comfortable, relaxed-fit trousers in soft materials as well as leather. White leather is a new concept for us! Leather flip-flops. And a pair of cool platforms with a cork sole.

What's your best styling tip?

– Combine what you already have with something new to liven things up. For example, try our glitter flip-flops – they go with everything.

Can you buy Teurn Studios products second-hand?

– A few months ago, I saw our very first piece – a coat – in a second-hand shop. I love the fact that our clothes have a good second-hand value and can become a new person's favourite.

What are your best tips for making the clothes in your wardrobe last longer?

Caring for your clothes! Use a fabric shaver on wool clothes. Air your clothes! That way you hardly ever have to wash them. Do you want your trousers to be shorter or longer? Have them adjusted by a tailor. It's inexpensive to make these kinds of alterations with a local one. Take the waist in or out. I also like to use gall soap – the world's best miracle product for leather.

And finally: if you could make 3 new purchases this year – what would they be?

– I'm going to live in TEURN's luxury flip-flops in charcoal-coloured leather. I'll wear them with either a shirt and trouser set, or a woven t-shirt and skirt. It's suitable for all occasions while still remaining casual.

Thanks, Anna, for your contribution.
